A SPECTACULAR ACCIDENT ON THE HIGHWAYS by Akiane Melly

On the morning of February 1st, 2023, a road accident took place on the busy highways of Algiers, Algeria. The accident involved two vehicles and caused significant damage to both cars.

The terrible accident happened when one of the drivers was trying to change lanes and collided with the other car. The impact caused both vehicles to turn out of control and bang into the median. The police arrived at the scene of the accident within minutes and started to investigate the cause of the crash.

According to bystanders, the Audi driver was at fault. They added that he overtook two trucks at a fast pace, lost control of his car at the sharp bend, and violently bumped into the Skoda causing it to spin and roll over. The cars were severely damaged, and the drivers of both cars were taken to the hospital for medical treatment. Fortunately, no one was seriously hurt; they only suffered minor injuries such as bruises and cuts. The police issued a warning to all drivers to be more careful on the roads and to pay attention to their environment. They also stressed the importance of respecting traffic laws and regulations to avoid accidents like this one.

In conclusion, the road accident on February 1st, 2023 was a wake-up call for all drivers to be more cautious on the road. "Let's all work together to make our roads safer for everyone.", said one of the police officers.

Australians are the happiest people in the world. This is according to a new survey. Interviewers asked 30,000 people in 30 different countries about their levels of happiness. Forty-six percent of Australians said **they** were “very happy”. Following them was the USA (40 percent), Egypt (36 percent), India (34 percent) and the UK and Canada (32 percent). Hungary finished top of the “miserable” list. Thirty-five percent of its citizens said **they** were “very unhappy”. Second most miserable were Russians, at 30 percent.

The research showed **that** money and age affected how happy people are. The study did not show that money can buy happiness, but it revealed a link between a lack of money and unhappiness. Unhappier people were in lower income groups or unemployed. The study also suggested the older we become, the less happy we are. Globally, teenagers are the happiest people. The least happy age group is 50/59 ; only 16 percent of those in their fifties said they were very happy.

To conclude, we can confirm that the things that make us happy include good health, financial security and a happy marriage, not cars and clothes.

PART ONE: Reading 15points. Read the text and do the activities.

Teachers may feel underpaid and unappreciated. However, according to the results of a recent career survey, **they** are influencing and inspiring a very large category of people: teenagers. The survey **found** that teaching is a top career choice for teenagers, ranking as high as **doctor** - a frequent favorite job - and just above **lawyer**, which is another popular choice.

The survey was based on responses from more than 1,000 people who were aged from 13 to 17. The question asked was, "What kind of work do you think you will do for a career?" The teenagers were **asked** to give **their** top three choices. In addition to the three jobs mentioned above, the other top ten teenagers' choices included sports, science, architecture, business, the military, engineering and nursing.

→ **Results** have always differed between girls and boys. For example, a military career has never been a top-ten choice among girls, but **it** is often popular with boys. On the other hand, nursing is usually a popular choice with **girls**, but has never made the top ten with boys.
