

MR : BOUKEZOULA HOUCEM

- Look at the following pictures and answer the questions above :

- Who is the person represented in the picture?

.....he is Neil Armstrong.....

- What is his favourite saying?

it's a small step for me but it's a giant leap
for mankind.

Can you guess the name of the unit?

Unit 03: Astronomy and solar system

Theme: "It's a Giant leap for Mankind

\Rightarrow humanity
huge jump

Activity 01: put the following words next to their definitions.

Definitions	Words
1. Any object existing in space, especially a planet, star, or the moon.	Heavenly bodies
2. A building from which astronomers can watch celestial bodies.	Observatory
3. The sun and the group of planets which move around (orbit) it.	Solar System
4. The scientific study of the space and universe.	Astronomy
5. a device sent up into space to orbit the Earth, used for collecting information and make weather forecasts.	Satellite
6. is science that studies the influence of star positions on people's fate	Astrology

Astronomy / heavenly body / observatory / satellite / solar system / Astrology

- Activity 02: Match the following words with appropriate pictures.

Asteroid / The Galaxy / Meteor / astronaut / astronomer / The Solar system / The Moon /
Artificial Satellite

1. astronaut

2. Galaxy

3. Meteor

4. asteroid

5. moon

6. astronomer

2

Artificial
Satellite

Look at the picture below and answer the following questions.

Who am I?

MR : BOUKEZOULA HOUCEM

• I am a huge hot star in the solar system. You don't look directly at me; i can hurt you I am **Sun**.....

• I am closer to the sun than Saturn. I am smaller than Jupiter. I am bigger than Venus. I am **Earth**.....

• I am the smallest planet in the solar system. I am closer to the sun than the earth. I am **Mercury**.....

• I am the farthest planet from the sun. My twin brother is Uranus.

I am **Neptune**.....

- we can understand where we came from, where we are going
- We can predict such catastrophes as tsunamis and earthquakes like it happens recently in turkey and Syria.
- we can know in advance the weather changes days and weeks before this day
- to protect ourselves from the outer dangers such as comets and asteroids
- it has contributed in vastly improved technology such as in computer and smart phones

Ladies and Gentlemen,

Astronomy is the scientific study of the space and universe and I believe that it is one of the most useful sciences today. **First of all**, it's thanks to astronomy that we can understand where we came from, where we are going. **In the same vein**, due to many satellites, we can now predict such catastrophes as tsunamis and earthquakes like it happens recently in turkey and Syria: **Furthermore**, it allows us to know in advance the weather changes days and weeks before this day. **Finally**, astronomy science has contributed in vastly improved technology such as in computer and smart phones. **In general**, in astronomy, the Universe is our laboratory... Thank you for your attention.
