

PART ONE: Reading

A. Comprehension

(15 points)

(08 points)

Read the text carefully then do the following activities.

An estimated 158 million children aged 5-14 are engaged in child labour- one in six children in the world. Millions of children are engaged in hazardous situations or conditions such as working in mines, working with chemicals and pesticides in agriculture or working with dangerous machinery. They are everywhere but invisible: toiling as domestic servants in homes, labouring behind the walls of workshops, hidden from view in plantations...

In Sub-Saharan Africa, one child in three is engaged in child labour, representing 69 million children. In South Asia, another 44 million are at work.

Children living in the poorest households and in rural areas are most likely to be engaged in child labour. Those burdened with household chores are girls. Millions of girls who work as domestic servants are especially vulnerable to exploitation and abuse.

The UNICEF often interferes with children's education. Ensuring that all children go to school and that their education is of good quality, is a key to preventing child labour.

Adapted from "UNICEF, Social Media".

1. Circle the letter which corresponds to the right answer.

The text is: a. descriptive. **b. expository** c. prescriptive.

2. Write the letter which corresponds to the right answer.

A. children are engaged in child labour in the world.

a. One out of six

b. Fifty eight million

c. Sixty nine million

B. Some African and Asian children are working in

a. fair conditions.

b. unsafe conditions.

c. legal conditions.

C. Girls in rural areas are boys.

a. less exploited than

b. as exploited as

c. much more exploited than

D. The UNICEF is an institution which.....

a. encourages child labour.

b. protects children from child labour.

c. prevents children's education.

↳ it is completely true that child labour is one of the biggest issues in the world, it is any work that harms the mental and physical safety of children, besides the expansion of this dilemma is due to various reasons.

↳ To begin with, no one can deny that poverty is the primary cause, because when families

cannot afford their basic needs, they force their kids to work in order to survive.

In the same vein, it is well known that even lack of schools and transportation

are ones among the responsible reasons as

they encourage children to give much importance to work rather than studying.

Overall, eliminating this phenomenon requires the cooperation of all society.

↳ Advertising is a commercial communication that promotes a product or a service. This tool has become a critical one especially in commerce.

↳ **Firstly**, Advertising reduces distance between companies and consumers which save more energy and time on them. **Secondly**, no two people can disagree that it facilitates the purchasing procedures that play a vast role in boosting sales.

and economy. finally, Ads help in
Limiting counterfeiting by informing
consumers about the Real price and
Characteristics.

To conclude, Advertising is
a double sided tool that can be beneficial or
harmful depending on how to use it.

The Hubble space telescope is a deep space imager used by NASA to explore space. It collects light, magnifies images and gives astronomers the most detailed images unknown to man. Hubble has been at work since April 25, 1990, and celebrated its 20th anniversary in orbit on April 24, 2010.

Twenty years in service, and still being the leading source for space news, says a lot about Hubble's overall longevity and productiveness. Over 6000 scientific articles have been published based on Hubble data with some of its discoveries being so significant that NASA would have needed multiple satellite missions to accomplish the same results. Its importance to me is based on my lifelong interest in astronomy, and the galaxy where we live in.

Its importance to others, such as NASA and astronomers around the world, is due to the fact that Hubble is currently the leading source for new information and ground-breaking discoveries when it comes to deep space. But, after a stalled launch in 1985, five repair missions since its beginning, and billions of dollars in funding, I asked myself: "Is Hubble worth it?"

1. Circle the letter that corresponds to the right answer.

The text is:

- a. a newspaper article. b. an extract from a book. c. a website article.

2. Are these statements true or false? Write T or F next to the letter corresponding to the statement.

- a. Hubble space telescope retransmits pictures to astronomers. T
b. NASA celebrated the twentieth anniversary of Hubble here on Earth. T
c. Hubble is useful to provide NASA with necessary data. T
d. The 1985 space mission was unsuccessful. T

3. Answer the following questions according to the text.

- a. When did Hubble telescope start work?
- b. Is the writer interested in astrology? Justify from the text. *No, he is not.*
- c. Why is Hubble telescope important?

4. In which paragraph is the cost for the reparation of Hubble telescope mentioned? *3P*

5. Who or what do the underlined words refer to in the text?

- a. It (§1)
- b. where (§2)
- c. others (§3)

B. Text Exploration

(07 points)

1. Find in the text words whose definitions follow.

- a. to travel in order to learn about something. (§1) *to explore*
- b. facts or information. (§2) *Data*
- c. the scientific study of the sun, moon, stars, planets, etc. (§2) *astronomy*
- d. at the present time. (§3) *currently*

2. Divide the following words into roots and affixes.

productive - impossible - exploration

prefix	root	suffix
/	Product	ive

im possible

3. Ask questions which the underlined words answer.

a. We use the telescope to magnify distant stars.

b. The telescope was invented in the 16th century.

c. Thousands of satellites revolve around the planet Earth.

=> why do we use the tele? (لماذا نستخدم التلسكوب؟)
=> when was the telescope invented? (متى تم اختراع التلسكوب؟)
What revolves...? (ماذا يدور...؟)

4. Classify the following words according to the pronunciation of their final "s".

missions - planets - telescopes - images

/s/	/z/	/ɪz/

5. Reorder the following sentences into a coherent paragraph.

a. as they are quite similar in size and gravity. 3

b. Astronomers have known Venus for thousands of years.

c. It is sometimes called the sister planet of the Earth

d. Anyway the two planets are very different. 6

it is well known that Mars is the
3rd planet in our solar system, and
lots of people are wondering about the possibility
of life on this Planet.

First of all, unlike Earth, this planet
has more space with no inhabitants, no
traffic jams and no pollution that would give
to people a hope in a new world to explore and live.

but unfortunately, Mars contains no form of life, no water, no air and no nice places to visit contrary to our planets, that's why life would be so boring and frightening there.

↳ To conclude, I believe that our small blue planet is the most suitable for us, so we should preserve it and take care of it.
