Drawbacks
disadvantages

1. These products do not last for long. Since they are made of a very poor quality.

2. Fake products are neither guaranteed nor repairable.

3 => fake products as food, medicine and cosmetics have a disastrous impact on the health and life of consumers.

4 => Counterfeiting limits creativity and Innovation which weaken the progress of nations

⇒ Counterfeiting gives a bad reputation to the country. As a result, it leads to the flight of foreign investments as well as destroying the economy.

Solutions

⇒ The original brands had better reduce the price of their products so that people can afford them.

⇒ it would be advisable to aware consumers about the risks that can occur behind the fake products.

The Risks of Buying Counterfeit Products

Some people argue that counterfeiting benefits consumers by giving them access to lower-price goods. However, this is a totally mistaken claim.

Firstly, counterfeit products are low-quality imitations **that** do not last long. **Furthermore**, they are not guaranteed or repairable. **Secondly**, Fake food, medicines, cosmetics, and children's products have a disastrous impact on the health and lives of consumers **because** they contain a wide range of unacceptably dangerous ingredients **that** can cause cancer and other long-term health problems. **Finally**, counterfeiting limits creativity and innovation while also it gives a bad reputation to the country, **as** is the case with Chinese products.

In short, people should avoid buying counterfeits due to the negative consequences. Original brand manufacturers should also lower the prices of their products. As a result, consumers can afford them.
