How to Improve our educational system

Education is one of the most important pillars in every country since it allows us to evaluate and develop our skills while also allowing us to exchange our knowledge with others. The educational system in Algeria has recently degraded; therefore we must take some new measures to improve it.

Firstly, we should change the curriculum of all the educational stages. **For instance**, erasing the useless subjects and modules and focusing on soft skills **such as** languages, computer science. **Secondly**, it would be better if we reduce the number of students in classes **because** it is difficult for the teacher to control a large number of students, and it is difficult for the student to acquire information due to pressure and chaos. **Finally**, the government must provide modern educational aids **such as** internet surfing, laptops, electronic notebooks, computer, educational games and online dictionaries **which** would have a positive effect on our educational system.
