Good morning ladies and Gentlemen, (===== Greeting)

We are proud to present you our new eco -friendly home "Eco-Nest 3000". First, It is a home that is designed to be environmentally friendly that has to say, Eco-Nest 3000 is built so as not to impact the environment and the nonrenewable energies.

Secondly, our Eco Nest 3000 is built with eco-friendly materials such as solar panels and wind turbines to generate electricity relying on special machines and home-made reservoirs to store rainwater and purify it so that it can be variously used whether for drinking, washing or irrigating.

Besides, double gaze windows are installed to trap the heat inside so that huge sums of money can be saved on the energy bill each year. Concerning waste disposal, domestic garbage is used as fertilizers in the gardens and lawns.

So, Eco -Nest3000 is definitely the friend of your health and your wallet /budget too

You enquire, we answer. You order we deliver. Thanks you so much for your time and attention
